Publications of Bernard Shiffman

Click on a title to download a publication. Some of these publications are protected by copyright; access is provided for noncommercial educational and research purposes only.

1. On the removal of singularities of analytic sets, *Michigan Math. J.* 15 (1968), 111–120.

2. Local complex analytic curves in an analytic variety, *Proc. Amer. Math. Soc.* 24 (1970), 432–437.

3. On the continuation of analytic curves, *Math. Annalen* 184 (1970), 268–274.

4. On the continuation of analytic sets, *Math. Annalen* 185 (1970), 1–12.

5. Extending analytic subvarieties, in: *Symposium on Several Complex Variables, Park City, Utah, 1970*, Lecture Notes in Math., Vol. 184, Springer-Verlag, 1971, 208–222.

6. (Research announcement) Extension of positive holomorphic line bundles, *Bull. Amer. Math. Soc.* 77 (1971), 1091–1093.

7. Extension of holomorphic maps into Hermitian manifolds, *Math. Annalen* 194 (1971), 249–258.

8. Extension of positive line bundles and meromorphic maps, *Inventiones Math.* 15 (1972), 332–347.

9. (with M. Cornalba) A counterexample to the "Transcendental Bezout problem", *Annals of Math.* 96 (1972), 402–406.

10. (with R. Harvey) A characterization of holomorphic chains, *Annals of Math.* 99 (1974), 553-587.

11. Applications of geometric measure theory to value distribution theory for meromorphic maps,in: *Value-Distribution Theory, Part A*, Marcel-Dekker, New York, 1974, pp. 63–96.

12. Nevanlinna defect relations for singular divisors, *Inventiones Math.* 31 (1975), 155–182.

13. (Research announcement) Extension of holomorphic maps, *Bull. Amer. Math. Soc.* 82 (1976), 293–296.

14. Holomorphic and meromorphic mappings and curvature, *Math. Annalen* 222 (1976), 171–194.

15. (Survey Article) Holomorphic curves in algebraic manifolds, *Bull. Amer. Math. Soc.* 83 (1977), 553–568.

16. Holomorphic and meromorphic mappings and curvature II, *Math. Annalen* 230 (1977), 15–23.

17. On holomorphic curves and meromorphic maps in projective space, *Indiana Univ. Math. J.* 28 (1979), 627–641.

18. (with R. Molzon and N. Sibony) Average growth estimates for hyperplane sections of entire analytic sets, *Math. Annalen* 257 (1981), 43–59.

19. (with M. Kalka and B. Wong) Finiteness and rigidity theorems for holomorphic mappings, *Michigan Math. J.* 28 (1981), 289–295.

20. (with R. Molzon) Capacity, Tchebycheff constant, and transfinite hyperdiameter on complex projective space, in: *Séminaire Pierre Lelong-Henri Skoda*, Lecture Notes in Math. 919, Springer-Verlag, Berlin, 1982, pp. 337–357.

21. (Research announcement) New defect relations for meromorphic functions on $\mathbb{C}^n$, *Bull. Amer. Math. Soc.* 7 (1982), 599–601.

22. Introduction to the Carlson-Griffiths equidistribution theory, in: *Value distribution theory*, Lecture Notes in Math. 981, Springer-Verlag, Berlin, 1983, pp. 44–89.

23. A general second main theorem for meromorphic functions on $\mathbb{C}^n$, *Amer. J. of Math.* 106 (1984), 509–531.

24. (with A. J. Sommese) *Vanishing theorems on complex manifolds*, Progress in Math. 56, Birkhäuser, Boston, 1985.

25. (with A. J. Sommese) Vanishing theorems for weakly positive vector bundles, in: *Topics in several complex variables*, Research Notes in Math. 112, Pitman Publishing, Boston, 1985, pp. 61–68.

26. Remarks on the Nakano vanishing theorem, in: *Contributions to several complex variables*, Aspects of Math. E9, Vieweg, Braunschweig, 1986, pp. 251–260.

27. Complete characterization of holomorphic chains of codimension one, *Math. Annalen* 274 (1986), 233–256.

28. Degree bounds for the division problem in polynomial ideals, *Michigan Math. J.* 36 (1989), 163–171.

29. On separate analyticity and Hartogs theorems, *Indiana Univ. Math. J.* 38 (1989), 943–958.

30. Hartogs theorems for separately holomorphic mappings into complex spaces, *C.R. Acad. Sci. Paris* 310 (1990), 89–94.

31. Separately meromorphic functions and separately holomorphic mappings, *AMS Proceedings of Symposia in Pure Mathematics*, Part I, 52 (1991), 191–198.

32. Cohomology and splitting of Hermitian-Einstein vector bundles, *Math. Annalen* 289 (1991), 573–579.

33. (with S. Ji and J. Kollár) A global Lojasiewicz inequality for algebraic varieties, *Trans. Amer. Math. Soc.* 329 (1992), 813–818.

34. (with S. Ji) Properties of compact complex manifolds carrying closed positive currents, *J. Geometric Analysis* 3 (1993), 37–61.

35. Separately meromorphic mappings into compact Kähler manifolds, in: *Contributions to Complex Analysis and Analytic Geometry* (H. Skoda and J.-M. Trépreau, eds.), Vieweg, Braunschweig, Germany, 1994, pp. 243–250.

36. (with J.-P. Demailly and L. Lempert) Algebraic approximations of holomorphic maps from Stein domains to projective manifolds, *Duke Math. J.* 76 (1994), 333–363.

37. Synthetic projective geometry and Poincaré's theorem on automorphisms of the ball, *L'Enseign. Math.* 41 (1995), 201–215.

38. Singular metrics and singular differential forms in complex geometry (notes by M. Reimpell), *Schriftenreihe des Graduiertenkollegs Geometrie und Mathematische Physik*, Heft 12, Ruhr-Universität Bochum, 1995.

39. The second main theorem for log canonical $\mathbb{R}$-divisors, in: *Geometric Complex Analysis* (J. Noguchi et al., eds.), World Scientific, Singapore, 1996, pp. 551–561.

40. (with A. Russakovskii) Value distribution for sequences of rational mappings and complex dynamics, *Indiana Univ. Math. J.* 46 (1997), 897–932.

41. (with S. Zelditch) Distribution of zeros of random and quantum chaotic sections of positive line bundles, *Commun. Math. Phys.* 200 (1999), 661–683.

42. (with M. Zaidenberg) Two classes of hyperbolic surfaces in $\mathbb{P}^3$, *International J. Math.* 11 (2000), 65–101.

43. (with P. Bleher and S. Zelditch) Poincaré-Lelong approach to universality and scaling of correlations between zeros, *Commun. Math. Phys.* 208 (2000), 771-785.

44. (with P. Bleher and S. Zelditch) Universality and scaling of correlations between zeros on complex manifolds, *Invent. Math.* 142 (2000), 351–395.

45. (with S. Ivashkovich) Compact singularities of meromorphic mappings between complex 3-dimensional manifolds, *Math. Res. Lett.* 7 (2000), 695–708.

46. Uniqueness of entire and meromorphic functions sharing finite sets, *Complex Variables Theory Appl.* 43 (2001), 433–449.

47. (with P. Bleher and S. Zelditch) Universality and scaling of zeros on symplectic manifolds, in: *Random Matrix Models and Their Applications*, P. Bleher and A. Its (Eds.), MSRI Publications 40, Cambridge Univ. Press, 2001, pp. 31–69.

48. (with P. Bleher and S. Zelditch) Correlations between zeros and supersymmetry, *Commun. Math. Phys.* 224 (2001), 255–269.

49. (with S. Zelditch) Asymptotics of almost holomorphic sections of ample line bundles on symplectic manifolds, *J. Reine Angew. Math.* 544 (2002), 181–222.

50. (with M. Zaidenberg) Hyperbolic hypersurfaces in $\mathbb{P}^n$ of Fermat-Waring type, *Proc. Amer. Math. Soc.* 130 (2002), 2031–2035.

51. (with M. Zaidenberg) Constructing low degree hyperbolic hypersurfaces in $\mathbf{P}^3$, *Special issue for S. S. Chern, Houston J. of Math.* 28 (2002), 377–388.

52. (with S. Zelditch) Asymptotics of almost holomorphic sections of ample line bundles on symplectic manifolds: an addendum, *Proc. Amer. Math.* Soc. 131 (2003), 291–302.

53. (with S. Zelditch) Equilibrium distribution of zeros of random polynomials, *IMRN* 2003 (2003), 25–49.

54. (with T. Tate and S. Zelditch) Harmonic analysis on toric varieties, in: *Explorations in Complex and Riemannian Geometry: A Volume Dedicated to Robert E. Greene*, Contemporary Mathematics, vol. 332, Amer. Math. Soc., Providence, RI, 2003, pp. 267–286.

55. (with S. Zelditch) Random polynomials of high degree and Levy concentration of measure, *Asian J. Math.* 7 (2003), 627–646.

56. (with S. Zelditch) Random polynomials with prescribed Newton polytope, *J. Amer. Math. Soc.* 17 (2004), 49–108.

57. (with T. Tate and S. Zelditch) Distribution laws for integrable eigenfunctions, *Ann. Inst. Fourier (Grenoble)* 54 (2004), 1497–1546.

58. (with M. R. Douglas and S. Zelditch) Critical points and supersymmetric vacua, I, *Commun. Math. Phys.* 252 (2004), 325–358.

59. (with M. Zaidenberg) New examples of Kobayashi hyperbolic surfaces in $\mathbf{CP}^3$, *Funct. Anal. Appl.* 39 (2005), 90–94. (Russian version: *Funktsional. Anal. i Prilozhen* 39 (2005), 90–94)

60. (with M. R. Douglas and S. Zelditch) Critical points and supersymmetric vacua, II: Asymptotics and extremal metrics, *J. Diff. Geometry* 72 (2006), 381–427.

61. (with M. R. Douglas and S. Zelditch) Critical points and supersymmetric vacua, III: String/M models, *Commun. Math. Phys.* 265 (2006), 617–671.

62. (with T. Bloom) Zeros of random polynomials on $\mathbb{C}^m$, *Math. Res. Lett.* 14 (2007), 469–479.

63. Convergence of random zeros on complex manifolds, *Sci. China Ser. A* 51 (2008), 707–720.

64. (with S. Zelditch and S. Zrebiec) Overcrowding and hole probabilities for random zeros on complex manifolds, *Indiana Univ. Math. J.* 57 (2008), 1977–1997.

65. (with S. Zelditch) Number variance of random zeros on complex manifolds, *Geom. Funct. Anal.* 18 (2008) 1422–1475.

66. (with S. Zelditch) Number variance of random zeros on complex manifolds, II: smooth statistics, *Pure Appl. Math. Q.* 6 (2010), 1145–1167.

67. (with S. Zelditch and Q. Zhong) Random zeros on complex manifolds: conditional expectation, *J. Math. Inst. Jussieu* 10 (2011), 753–783.

68. (with S. Zelditch) Random complex fewnomials, I, in: *Notions of Positivity and the Geometry of Polynomials* (P. Branden, M. Passare, M. Putinar, editors), Trends in Math., Birkhäuser, Basel, 2011, pp. 375–400.

69. (with M. K. Ackerman, A. Cheng, E. Boctor, and G. Chirikjian) Sensor calibration with unknown correspondence: solving AX=XB using Euclidean-group invariants, *2013 IEEE/RSJ International Conference on Intelligent Robots and Systems (IROS) November 3–7, 2013, Tokyo, Japan*, pp. 1308–1313.

70. (with Z. Lu) Asymptotic expansion of the off-diagonal Bergman kernel on compact Kähler manifolds, *J. Geom. Anal.* 25 (2015), 761–782.

71. Uniformly bounded orthonormal sections of positive line bundles on complex manifolds; in: *Proceedings of the Conference on Analysis, Complex Geometry, and Mathematical Physics: In Honor of Duong H. Phong,* Contemporary Mathematics, vol. 644, Amer. Math. Soc., Providence, RI, 2015, pp. 227–240.

72. (with G. Chirikjian) Collision-free configuration-spaces in macromolecular crystals, *Robotica* 34 (2016), 1679–1704.

73. (with G. Chirikjian, S. Sajjadi, and S. Zucker) Mathematical aspects of molecular replacement. IV. Measure-theoretic decompositions of motion spaces, *Acta Cryst. A* 73 (2017), 387–402.

74. (with G. Chirikjian and S. Lyu) Mathematical aspects of molecular replacement. V. Isolating feasible regions in motion spaces, *Acta Cryst. A* 76 (2020) 145–162.

75. Asymptotic expansion of the variance of random zeros on complex manifolds, *J. Geom. Anal.* (2021), DOI 10.1007/s12220-020-00604-x.
